## Front Brake Line Kits

Front brake line kits consist of all brake lines under the hood. This includes the master cylinder to the distribution, combination, and/or metering valve. The left and right front lines that run to the front flex hoses are also included. Call for individual component pricing. These line kits are for vehicles with factory brake systems.

## Rear Axle Brake Lines

Rear axle brake lines include a pair of lines that run across the rear axle housing. These lines connect the wheel cylinders or calipers to the flex hose in the middle of the rear end. These lines work with original housings and axles that use factory brakes. Modifications such as rear disc brakes or narrowed rear ends will likely require special lines. Call for more information.

## Fuel Tank Vent Lines

Fuel tank vent lines allow the air inside the fuel tank to escape as it is filled with fuel. They also prevent pressure from building up due to temperature changes.
