

Front Brake Line Kits

Front brake line kits consist of all brake lines under the hood. This includes the master cylinder to the distribution, combination, and/or metering valve. The left and right front lines that run to the front flex hoses are also included. Call for individual component pricing. These line kits are for vehicles with factory brake systems.

Front to Rear Brake Lines

Front to rear brake lines go from the distribution, combination, and/or metering valve along the length of the vehicle to the rear flex hose. Lines are manufactured in 1 or 2 pieces based on factory specifications.

PROBLEMS OR QUESTIONS? GIVE US A CALL!

We have a favorite saying here at The Right Stuff Detailing: "No Problems, Just Solutions". If you have a technical question or problem, before the sale or after, simply give us a call. If it's in our catalog, it's in stock and we know about it. We're always just a free call away. We enjoy helping and guiding customers through support, because we have the most friendly and best tech support in our field. Give us a call toll free at 1-800-405-2000.

Rear Axle Brake Lines

Rear axle brake lines include a pair of lines that run across the rear axle housing. These lines connect the wheel cylinders or calipers to the flex hose in the middle of the rear end. These lines work with original housings and axles that use factory brakes. Modifications such as rear disc brakes or narrowed rear ends will likely require special lines. Call for more information.

Fuel Pump to Carburetor Lines

Fuel pump to carburetor lines connect the fuel pump to the carburetor. Brass blocks and fittings are included as noted. These lines are intended to work only with factory pump, motor, intake and carburetor combinations. If your system is not 100% stock, call us at (800)405-2000 to discuss available options.

Return Fuel Lines

Return lines carry excess fuel from fuel pump or fuel filter back to the tank. Not all vehicles were equipped with a return line. They are typically made of 1/4" diameter tubing. Individual runs with multiple sections are noted.

Thermal Choke Control Tubes

Thermal choke lines carry heat from the exhaust system to the choke coil on the carburetor. Some applications route thru the intake manifold on their way to the carburetor.
